

Weather Activity

Objective:

Students use assistive technology to report the day's weather and date, enhancing their understanding of calendars and weather patterns.

Assistive Technology Used:

Sequential message communicators like Step-by-Step or QuickTalker.

Materials:

Calendar

Weather symbols or pictures (sunny, rainy, cloudy, etc.)

Activity Setup:

Record phrases related to the weather (e.g., "Today is sunny") and dates on the device.

Instructions:

Each day, a student uses the communicator to announce the date and describe the weather, using the recorded phrases.

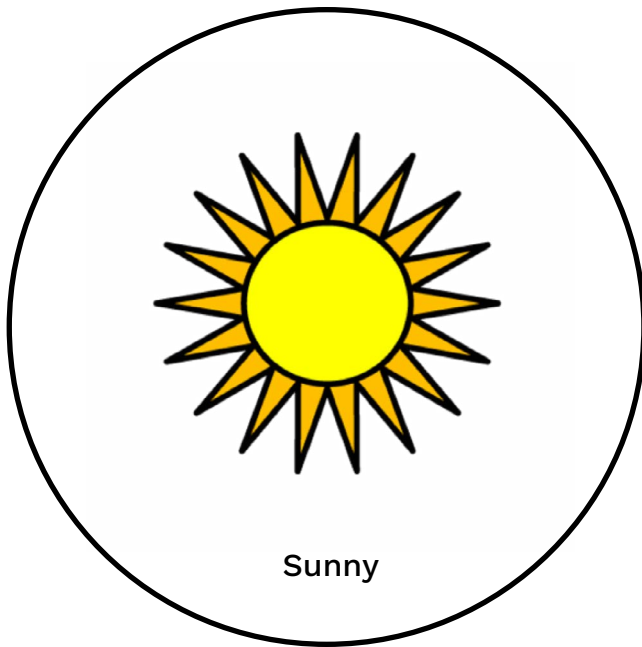

Students can match the weather report with corresponding symbols or pictures.

Expected Outcomes:

Students will learn to identify weather conditions and understand calendar concepts, fostering daily routine awareness.
