

# Our Commitment to the Environment

AbleNet is committed to using sustainable resources, reducing our carbon footprint, and being forward-thinking in how decisions we make today may impact the environment. Recent improvements to the QuickTalker Freestyle speech device and packaging were influenced by our commitment to the environment and support our continued focus on product improvement.

## QuickTalker Freestyle Packaging

### Decreased Packaging Material Used

*On average, our new packaging uses 40% less cardboard.*

### Removed Hard to Recycle Materials

*We removed bubble wrap and foam from our new packaging.*

### Reduced Transportation Footprint

*Our smaller box takes up less space during transport, meaning more packages are shipped simultaneously.*

### Eliminated Paper Instruction Manuals

*Our getting started guide is now printed directly on the packaging box.*

## QuickTalker Freestyle Speech Device

### Made from Recycled Materials

*The device enclosure uses 100% recycled aluminum.*

### Exceeds Energy Star Requirements

*The device uses 63% less energy than the ENERGY STAR efficiency requirement.*

### Free of Harmful Materials

*The device is free of arsenic, mercury, brominated flame retardant, PVC, and beryllium.*
