

AAC in the Classroom for Students with Significant Disabilities

Session 3 – Analyzing Data from LoTech AAC & Apps

Webinar by:
Kelly Fonner, MS
Assistive/Educational
Technology Consultant

A 3 Part Series: **AAC in the Classroom for Students with Significant Disabilities**

Session 1 – A Progression Strategy From BIGmack® to SoundingBoard and Beyond

Session 2 – Implementation & Data Collection on LoTech AAC & Apps

Session 3 – Analyzing Data from LoTech AAC & Apps

2014 * www.kellyfonner.com

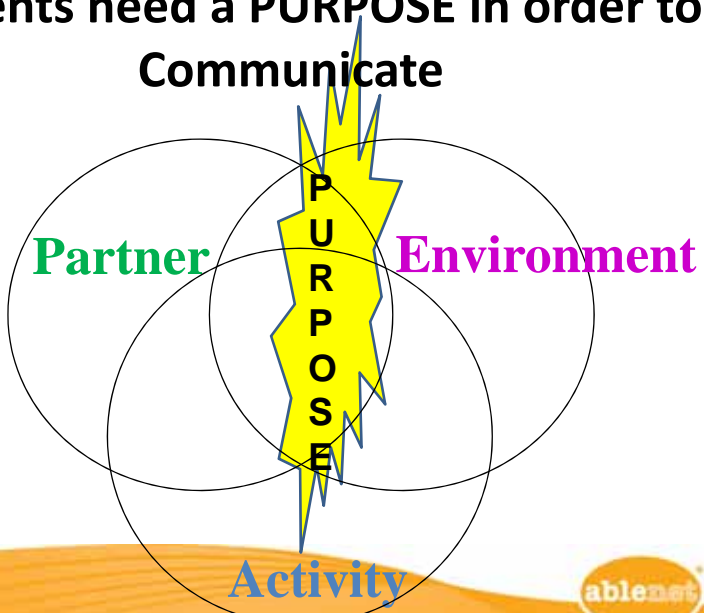

POLL:
How Many of You Have been with Us?

- 1) This is my first session. I haven't viewed either of the other Sessions.
- 2) This is my 3rd session!
- 3) I viewed session 1, but not session 2
- 4) I viewed session 2, but not session 1
- 5) I have no idea if I have viewed one of the previous sessions
- 6) Would rather not respond.

Communication Enhancement Process (CEP) Project

Oakland County Schools, Michigan (6 years)

Ohio – Regions 2, 3, 8, & 9 (1st year)

SESSION 3 - AAC in the Classroom for Students with Significant Disabilities

Communication Matrix

Type of Symbol
For Levels V, VI or VII, specify types of symbols used (e.g., picture symbols, 3-dimensional symbols, manual signs, speech)

FEATURES

- Pre-intentional Communication Behaviors: requires ability of with long object & reach behaviors (Level I)
- Intentional Communication Behaviors: requires communicative through motor and vocal behaviors (Level II)
- Intentional Communicative Behaviors: requires communicative through (Levels III-V)
- Symbolic Communication: requires communication through the use of symbols (Levels V-VII)

The CEP Process

1. Communication Matrix
2. Day Map of Activities
3. Script of Activity & Prompting Hierarchy
4. Data Collection

Planning Communication Opportunities
The CEP Process

- 1) The Communication Matrix:
 - Conduct a baseline on each student
- 2) Use the student's day/ or the Classroom Schedule
 - Determine the day/Parts Type of Communication Opportunity
 1. Preference to be given
 2. Intentionality
 3. Relationship
 4. Collaboration
 5. Communication check
 - Plan with the student to specify the communication needs for the day/Parts type
- 3) Script an Activity to include Communication Targets
 - Parts of a Script:
 1. Student Information (Name, Age, School, District)
 2. Activity Information (Topic, Strategy, Communication Purpose, Objective, Object)
 3. Environment Setup (Positioning of Student, AAC Materials, Communication Partner & Duration of 2nd person's needed)
 4. Teaching Sequence
 - Start Script of the Activity (Use visual, verbal, video, sensory & 2nd person's needed)
 - Target Student Behavior (What the student is supposed to communicate & how the communication is to be used)
 - Contingency for When the Student Does not Use the Communication (What the staff should do if the student does not include the prompting hierarchy/Teaching Sequence for the script solution for when the student does not communicate or is not able to use the message)
- 4) Create Data Collection for Each Activity
 - 2 Types of Data Collection in CEP
 - For Preference Assessment
 - For Those with Prompting Hierarchy (Use of Prompting)

© Kelly Fonner & Kelly Fonner © 2012

Communication Activity Purposes

- Preference Assessment (p13-15)
- Establishing Intention Communication (p16-20)
- Reinstatement
 - I want more! (p21-22)
 - Time to change (p22-23)
- Gaining Attention (p25-32)
- Communicating Choices (p33-35)
 - Choice Making
 - Preferred items
 - Non-preferential items/ Distractors
 - Rejection

Preference Assessment Script

Script ID# : for office use only		District: Other		Date: 9/24/2013	
Student First name: Click here to enter text.		Age Range: 9-12		Communication Purpose: Preference Assessment	
Activity Topic: Leisure		Criteria (Measurable): Daily, once a day, 9 out of 10 opportunities within 30 seconds			
Sub Topic: Preference Assessment.		Objective: Student will communicate a preference by touching/grabbing/reaching towards the item when given a choice of 2 items.			
ENVIRONMENT		TEACHING ROUTINE			
Setting, Partner, Position	Staff Set-up of Activity		Student Target Behavior	Consequence given by staff	
Setting: Classroom Materials: age appropriate set of 10 toys, sensory items, books Positioning of AAC device: out of student's reach, to be activated by staff after selection Positioning of student: 1) at table, 2) on floor, 3) in stander Position of Communication Partner: 1) beside him; 2) behind him; 3) in front of him Position of Communication Facilitator: may be needed when he is on floor.	Staff cues (verbal, visual): Present 2 items visually (hold steady) and say "Student, which one do you want?"	Staff assistance (physical): If the student is on the floor, sit behind him to help maintain steadiness. There may be a need for a 2 nd staff member to present the items from the front.	What student communicates: "I want that one" How student communicates: touching/grabbing/reaching towards one item	If student does: touching/grabbing/reaching towards the item If student doesn't: touching/grabbing/reaching towards the item	Then staff: 1) Activates communication device "I want that" 2) records choice 3) if student plays with item for over 15 seconds the staff will say "Student likes the ____" 4) After 30 seconds, remove item & represent 2 new items Then staff: 1) records non-choice 2) presents 2 new items

2014 * www.kellyfonner.com

Reinstatement Requesting "More"

Script ID#: Project staff only District: _____ Age Range:(circle) Birth-2, 3-5, **6-9**, 9-12, 13-26

Activity Topic:(circle) academic, community, food, job, **PE**, self help, sensory, social, other _____ Communication Purpose:(circle): preference assessment, refuse, obtain, gain attention, **reinstatement**, make choice, social, get information, other _____

Sub Topic scarf Criteria (Measurable) Once daily during leisure time; Increase use over baseline from accidental swipes of switch to initiating reinstatement within 3 minute period

Objective: Student requests more of interaction with desired item

ENVIRONMENT	TEACHING ROUTINE		Consequence given by staff		
Setting, Partner, Position	Staff Set-up of Activity		Student	Staff	
Setting: Classroom Materials: Scarf, wobble switch covered w/scarf material connected to voice output Positioning of AAC device: Switch n tray to L side of student; device below Positioning of student: In WC with tray Position of Communication Partner: In front of student Position of Communication Facilitator: NA	Step #1 Staff cues (verbal, visual, sensory): Introduce Scarf "Here's your scarf"	Staff assistance (physical): Swipe scarf over her to start activity to gain attention And PAUSE 10 seconds	What student communicates: "more scarf waving" & other scarf related messages How student communicates: Swiping/Pulling on Wobble Switch	If student does: Request more If student doesn't After 10 seconds Request more If student doesn't: After 10 seconds Request more	Then staff: Swipes scarf over her for 10 seconds & comments on "more scarf" & "you like scarf" Then staff: Taps hand & Says "Kaylan - More Scarf" Then staff : Using Hand Under Hand Brings student Hand to Switch to Activate

2014 www.kellyfonner.com

Data Collection Charting

For students that you are doing a preference assessment or teaching a communication intent/behavior

- Data Collection through Daily Performance Data
- (p.15, 16, 39)

Marking Code for "More"

- List each item to be presented
- Present ONE item at a time
- Mark with + if chosen
- Give item for predetermined period of time
- Change to next item when no longer requesting

Student: _____

Function targeted: _____

Date: _____

Items	1	2	3	4	5	6	7	8	9	10	%

Protocol _____ Scoring System _____ Session Total % _____

Data collection from Design To Learn

Reinstatement with Prompting Hierarchy

Oakland Schools Communication Enhancement Project
COMMUNICATION SCRIPT

Script ID#: _____ Date Saved: 1/26/11
 Student First Name/Initial: _____ Age Range: 0 - 5
 Activity Topic: Lessons Communication Purpose: Reinstatement
 Sub-Topic: (Priority Reinforcement) Criteria: (Measurable) 100% at initial use 3 out of 3 days per week.

Objective: Student will increase performance by 10% in two-page of book.

ENVIRONMENT	TEACHING ROUTINE			
Setting, Partner, Position	Staff Set up of Activity	Student Expressive Communication	Contingencies Given by Staff	
Setup	Staff: Open (verbal, visual) "Nathan let's read!"	Staff Assistance (physical) opening of book	Initial Student Communication: "read more"	If student does touch visual/tactile switch Then staff turns page and read next page.
Opening communication book	Staff then opens book and reads first page.		If student doesn't touch visual/tactile switch Then staff presses the verbal cue, "let me if you want to read more."	
Materials: grounded motor book, pad pen			If student doesn't touch visual/tactile switch Then staff points to the corner of the book.	
Positioning of AAC Device (If pad in book of book assistance will be out of reach)			If student doesn't touch visual/tactile switch Then staff models touching the bottom corner of the book with the "more" visual to activate switch.	
Positioning of Student (face, shoulder, or feet)		How Student Communicates: By touching corner of book with more visual located at bottom right hand corner of every page.	If student doesn't touch visual/tactile switch Then staff provides partial physical assistance and guides student's hand to corner of book to activate switch.	
Position of Communication Partner next to student			If student doesn't touch visual/tactile switch Then staff Provides full physical assistance and provides hand over hand assist to	
Position of Communication Facilitator next to or behind student

"Go" Activity with Prompt Hierarchy

Script ID# : Megan Hudechek and Megan Sokol	District: Huron Valley Schools	Age Range: 3 - 8
Activity Topic: Leisure	Communication Purpose: Make choice	
Sub Topic: Click here to enter text.	Criteria (Measurable): 2x daily	

ENVIRONMENT	TEACHING ROUTINE																	
Setting, Partner, Position Setting: classroom Materials: big mac switch and visual choices of walk, wagon, scooter, and walk on big macs. Positioning of student: ambulatory in classroom Positioning of AAC device: big mac is permanently placed on window next to door. It is within height range of all students. Positioning of student: ambulatory and needs to walk to door. Position of Communication Partner: at door Position of Communication Facilitator: Click here	Staff Set-up of Activity	Staff assistance (physical): Click here	Student Target Behavior															
	Step #1 Staff cues (verbal, visual): Step#1: Depends upon the time of day "Ruby, it's free choice time, what do you want to do?"		What student communicates: I want to go bike, go walk, go wagon ride etc. How student communicates: By manipulating big mac with the picture choice she wants say "go walk or ___".	<table border="1"> <thead> <tr> <th>Consequence given by Student</th> <th>Consequence given by Staff</th> </tr> </thead> <tbody> <tr> <td>If student does: walk towards door</td> <td>Then staff: Stand by door and wait.</td> </tr> <tr> <td>If student doesn't: manipulate switch</td> <td>Then staff: point to big mac. NO VERBAL</td> </tr> <tr> <td>If student doesn't: manipulate switch</td> <td>Then staff: Model manipulating switch. NO VERBAL</td> </tr> <tr> <td>If student doesn't: Manipulate switch</td> <td>Then staff: Say, What do you want to do?" and move her hand to switch</td> </tr> <tr> <td>If student doesn't: manipulate switch</td> <td>Then staff: Tell me you want to go & move hand to switch</td> </tr> <tr> <td>If student doesn't: manipulate switch</td> <td>Then staff: tell me you want to go & physically assist</td> </tr> </tbody> </table>	Consequence given by Student	Consequence given by Staff	If student does: walk towards door	Then staff: Stand by door and wait.	If student doesn't: manipulate switch	Then staff: point to big mac. NO VERBAL	If student doesn't: manipulate switch	Then staff: Model manipulating switch. NO VERBAL	If student doesn't: Manipulate switch	Then staff: Say, What do you want to do?" and move her hand to switch	If student doesn't: manipulate switch	Then staff: Tell me you want to go & move hand to switch	If student doesn't: manipulate switch	Then staff: tell me you want to go & physically assist
	Consequence given by Student	Consequence given by Staff																
	If student does: walk towards door	Then staff: Stand by door and wait.																
	If student doesn't: manipulate switch	Then staff: point to big mac. NO VERBAL																
	If student doesn't: manipulate switch	Then staff: Model manipulating switch. NO VERBAL																
	If student doesn't: Manipulate switch	Then staff: Say, What do you want to do?" and move her hand to switch																
If student doesn't: manipulate switch	Then staff: Tell me you want to go & move hand to switch																	
If student doesn't: manipulate switch	Then staff: tell me you want to go & physically assist																	

2014 * www.kellyfonner.com

Components of a Communication Script

Student Name	Date	Setting/Partner	Positioning	Mode	Target Behavior	Consequence
					Use AAC Communicate Intend	If Student says "This seat"
					Use AAC Communicate Intend	If Student says "This seat"
					Use AAC Communicate Intend	If Student says "This seat"

- 1) Objective(s)
- 2) Criteria
- 3) Materials
- 4) Environment (Setting, Partner, Positioning)
- 5) Teaching Routine
 - Staff cue & assistance (verbal, visual, physical)
 - Student target behavior (what do they communicate & how/mode)
 - Consequence (what happens if they do & what happens if they don't)

Some AAC Tools Used in CEP Activities

- Dedicated Tools
- Apps

Being an Effective Communication Partner

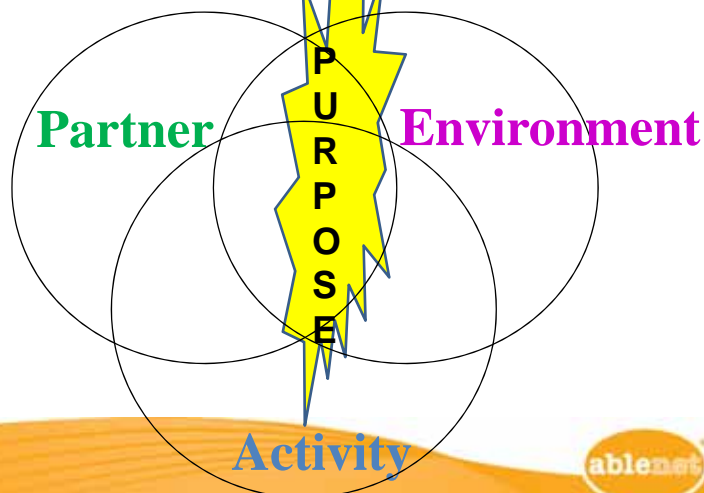

Partner

- Give time to respond
- Avoid excessive use of questions
- Avoid repeating or questioning a child's message
- Make available communication tools where & when needed

2014 * www.kellyfonner.com

Students need a PURPOSE in order to Communicate

Planning Communication Opportunities The CEP Process

1) The Communication Matrix

- Conduct an assessment on your student

2) List the Student's day / or the Classroom Schedule

- Each event of the day offers a Type of Communication Opportunity
 - Preference assessment
 - Intentionality
 - Reinstatement
 - Gain attention
 - Communicate choices
- From this list, choose specific activities to target as communication routines for the classroom staff to follow

This table is a grid for listing classroom activities. The columns are labeled 'ACTIVITY', 'Type of Communication Opportunity', and 'Targeted Skills'. Each row represents a different activity, and checkboxes are provided for selecting which communication opportunities are present in that activity.

3) Script an Activity to Include Communication Targets

- Parts of a Script:
 - Student Information (Name, Age, School District)
 - Activity Information (Topic, Subtopic, Communication Purpose, Objective, Criteria)
 - Environmental SetUp (Positioning of Student, AAC, Materials, Communication Partner & Facilitator -if a 2nd person is needed)
 - Teaching Routine
 - Staff SetUp of the Activity (Staff cues -verbal, visual, sensory & Staff physical assistance)
 - Target Student Behavior (What the student is supposed to communicate & How they are to communicate the message)
 - Consequences for After the Student Does and Does Not Communicate (What the staff should Do & or Say – this includes the Prompting Hierarchy/Teaching Routine for the staff to follow for when the student Does Not communicate or Initiate the message)

The Communication Script form is a detailed template for planning an activity. It includes sections for:

- Student Information (Name, Age, School District)
- Activity Information (Topic, Subtopic, Communication Purpose, Objective, Criteria)
- Environmental Setup (Positioning of Student, AAC, Materials, Communication Partner & Facilitator)
- Teaching Routine (Staff cues, Target Student Behavior, Consequences)

4) Create Data Collection to Match Activity

- 2 Types of Data Collection in CEP
 - For Preference Assessment
 - For Those with Prompting Hierarchies (adjust to #of Prompts)

This data collection chart is used for preference assessment. It includes fields for Student name, Function targeted, Date, and a grid for recording items over 10 trials. The grid has columns for items 1-10 and a percentage column. Below the grid are sections for Protocol, Scoring System, and Session #.

For Those with Prompting Hierarchies (adjust to #of Prompts)

This data collection chart is used for tracking communication with prompting hierarchies. It includes fields for Student name, Communication Partner, and Objective. The main table has columns for Date, Student Response, Facilitator Prompts (Visual, Verbal, Physical, Tactile), and Full Prompt.
