

Accessibility - Unleashing the power of mobile devices

Jennifer Courduff, Ph.D.
Azusa Pacific University
Azusa, California

Objectives

- Become familiar with accessibility features embedded in mobile devices in order to increase, maintain, or improve student accessibility to content (IDEA, 2004)
- Discover easy implementation ideas into teaching and learning activities

Why is this important?

Benefits

- Supports BYOD for all learners
- Supports natural inquiry (Common Core!)
- Uses tools that students have in hand
- Brings learning home
- Bridges parent-teacher communication

What's in there?

Android based devices

- TalkBack: preinstalled screen reader
- Explore by Touch: similar to VoiceOver
- Accessibility settings: modify display and sound settings

[Accessibility overview](#)

What's new in there? iOS9 devices

- Touch accommodations
 - Hold duration
 - Ignore repeat
 - Touch duration
- New keyboard pane for improved support of external Bluetooth keyboards
- Enhanced existing features
 - Switch control updated with more options for scrolling
 - Interactions now follow Vision

Interaction

Switch control: new in iOS7, updated in iOS8 and iOS9

1. iPad can be a switch itself
2. Switch - new switch - external, screen, camera
3. Auto scans through iPad apps

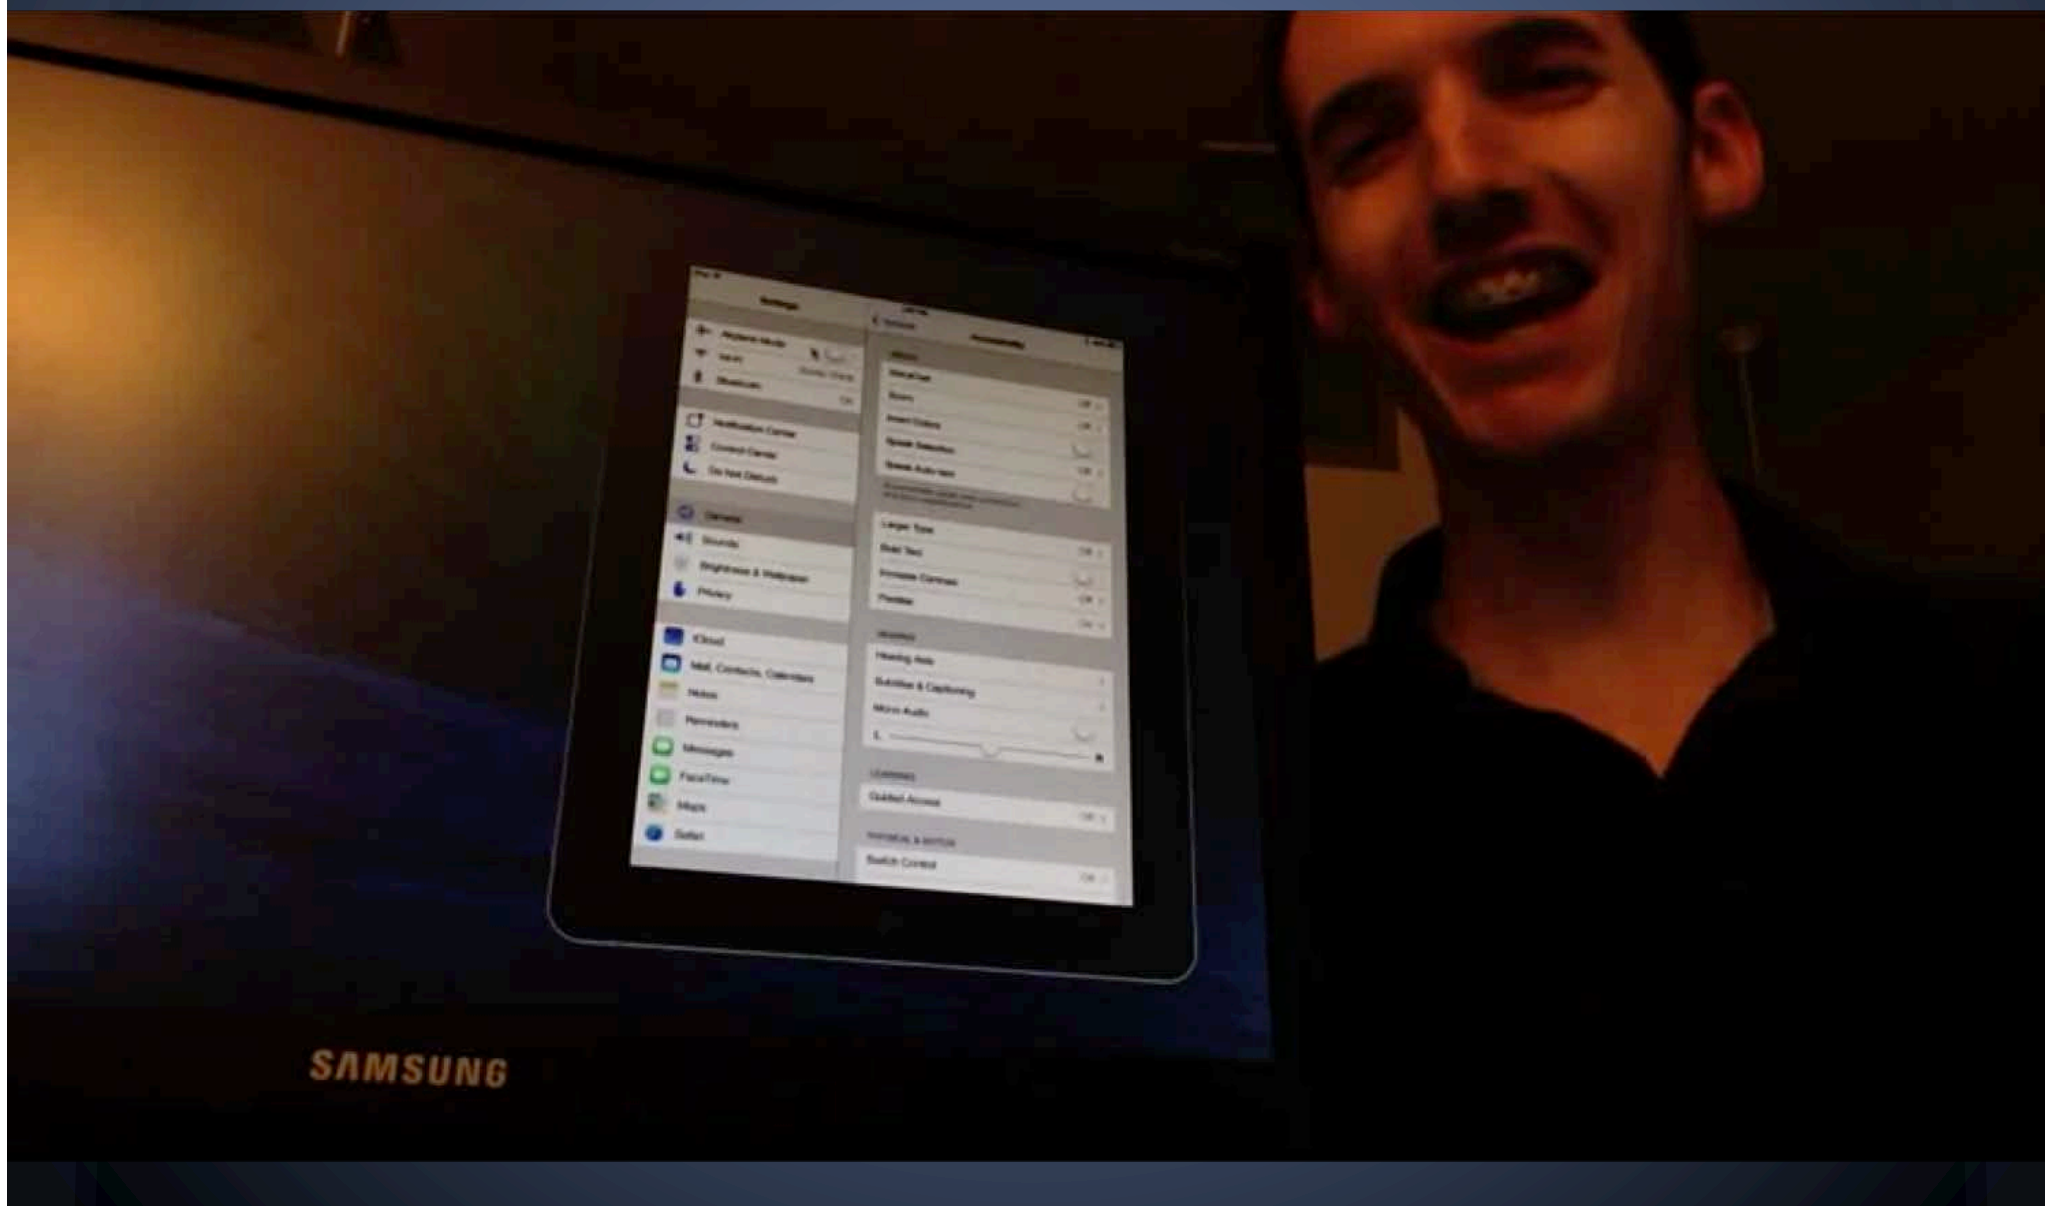

Christopher Hills

Switch control using head movements

How to set up a Switch

Interaction

AssistiveTouch

Allows access to iPad through a stylus or single digit

[< Accessibility](#) AssistiveTouch

AssistiveTouch

AssistiveTouch allows you to use your iPhone if you have difficulty touching the screen or if you require an adaptive accessory.

Customize Top Level Menu... >

CUSTOM GESTURES

Create New Gesture... >

Custom gestures allow you to record gestures that can be activated from Favorites in the Menu.

[< Accessibility](#) Touch Accommodations

Touch Accommodations

If you have trouble using the touch screen, adjust the following settings to change how the screen will respond to touches.

HOLD DURATION

Hold Duration

The duration you must touch the screen before a touch is recognized.

IGNORE REPEAT

Ignore Repeat

The duration in which multiple touches are treated as a single touch.

TAP ASSISTANCE

Off

Use Initial Touch Location

Use Final Touch Location

Enable Tap Assistance to allow any single finger gesture

Student use of Assistive Touch on the iPad

Pinch with one toe or finger iPad2 IOS7 Assistive Touch

Practice! AssistiveTouch

1. Home

2. Device - volume, lock rotation, more (shake, multitasking, screenshot, gestures)

3. Siri - voice command

4. Favorites - saved gestures

5. Notification Center

6. Control Center

7. Create New Gesture

- a. Record a swipe
- b. Click save
- c. Name the gesture

[← Back](#) Customize Top Level Menu...

Hearing options

Connect hearing aids via bluetooth

Subtitles and captioning - use this with your English Language Learners!

Guided Access: Why use it??

- Maintaining/Increasing Student engagement and productivity.
- Preferred medium to work on non-preferred task.
- Set up passcode for each student, device, or classroom.

Guided Access

●●●○ AT&T

1:52 PM

[< Accessibility](#) **Guided Access**

Guided Access

Guided Access keeps the iPhone in a single app, and allows you to control which features are available. To start Guided Access, Triple-Click the Home button in the app you want to use.

Passcode Settings

Time Limits

Accessibility Shortcut

When you Triple-Click the Home button while Guided Access is enabled, your Accessibility Shortcut settings will be displayed.

The screenshot shows an iPad interface for a Khan Academy app. On the left is a navigation menu with categories like 'Addition and subtraction', 'Multiplication and division', and 'Fractions'. The main area displays a video player for 'Salman Khan talk at TED 2011'. A large play button is centered on the video. A black rectangular overlay with the text 'Guided Access Ended' is positioned over the play button. The video player includes a progress bar and a transcript at the bottom. The top status bar shows 'iPad', '1:57 PM', and '68%' battery.

Salman Khan talk at TED 2011 (from ted.com)

0:16 The Khan Academy is most known
0:17 for its collection of videos,
0:19 so before I go any farther,
0:21 let me show you a little bit of a montage.
0:24 So the hypotenuse is now going to be five.
0:27 This animal's fossils are only found in this area of South America --
0:31 this nice clean band here --
0:32 and this part of Africa

Things to think about...

The SETT framework

- Student: Learning goals
- Environment: Learning place
- Task: Learning activity / challenges to accessing content
- Tool: Assistive technology that might increase access and motivation

<http://joyzabala.com/Documents.html>

What Works...

Stay simple!

Remote locking capabilities via "Find my iPhone"

Shared documents

Shared notes

Shared task lists

Challenges

- Student refuses to use the tool
- Lack of IT support for implementation, software updates, broken equipment
- Lack of funding
- Lack of team approach
- Parent buy-in

Putting it all together

Accessibility - Unleashing the power of mobile devices webinar:

Management and integration ideas

1. Start simple: One app, accessibility tool, or website at a time. Think in terms of weeks with one, not several in a week!
2. Management: One warning, device is taken for the day for second off-task behavior. Second offense and the device is delivered to the parent or taken for a longer period of time. (Think "One and done!")
3. The notes app is your friend. Great for student taking verbal notes (speech to text) or starting creative writing, poems, stories, or report brainstorming.
4. Foster inquiry: Have students use devices as part of the natural learning process. Ask "Mr. Google", or "Mr. Bing", or "Mr. Wikispaces", then have students compare findings. Evaluate answers, seeking to determine the most accurate answer.
5. Think digital citizenship: Foster continuous dialogue around accuracy of online information.
6. Get student buy-in: Create the content parameters and then facilitate - let them learn!
7. Get parent buy-in: Talk about mobile device use at Back to School night, then continue to present simple ideas via your class blog. Never underestimate the power of the phrase, "Go home and show your mom or dad ____"
8. Be open to tools that your students use in their personal lives and develop opportunities for them to repurpose the tools for learning. Yes, Instagram can be your friend.
9. Don't be afraid of serendipitous learning moments!
10. Again, keep it simple and well managed: Set small integration goals. One week, one tool.
