Both in his native Poland and beyond, Chopin's music, his status as one of music's earliest superstars, his association (if only indirect) with political insurrection, his love life and his early death have made him, in the public consciousness, a leading symbol of the Romantic era. His works remain popular, and he has been the subject of numerous films and biographies of varying degrees of historical accuracy. s|

Philosophy consists of many different elements: differing definitions, a complex origin with founding ideas, a wide scope and application, and a value and purpose in the world that we live in today; however, all of these pieces meld together to show that philosophy is all about "human thought".

At the most basic level, philosophy can be defined in different ways. "Dictionary.com" defines philosophy as "the rational investigation of the truths and principles of being, knowledge, or conduct." This definition implies that philosophy is a process of finding the truth or uncovering knowledge. Another definition by "Dictionary.com" is "a particular system of thought based on such study or investigation: the philosophy of Spinoza", which means that philosophy is a set of ideas of a specific group or individual. One last meaning of philosophy is "the critical study of the basic principles and concepts of a particular branch of knowledge, especially with a view to improving or reconstituting them: the philosophy of science." This definition signifies that philosophy is a way of viewing ideas; one should be skeptical, cautious, and reasonable when exploring new ideas, as well as looking to resolve them for the better.

Even though the word "philosophy" can mean different things, they all revolve around human thought.

Subheadings	Helvetica 14 bold	I will be consistent with the font across all pages so that it does not confuse the reader. The size is smaller than for a heading so it makes the text distinctive as a subheading

**The unanimous Declaration of the thirteen united States of America,**

When in the Course of human events, it becomes necessary for one people to dissolve the political bands which have connected them with another, and to assume among the powers of the earth, the separate and equal station to which the Laws of Nature and of Nature's God entitle them, a decent respect to the opinions of mankind requires that they should declare the causes which impel them to the separation.

We hold these truths to be self-evident, that all men are created equal, that they are endowed by their Creator with certain unalienable Rights, that among these are Life, Liberty and the pursuit of Happiness. --That to secure these rights, Governments are instituted among Men, deriving their just powers from the consent of the governed. --That whenever any Form of Government becomes destructive of these ends, it is the Right of the People to alter or to abolish it, and to institute new Government, laying its foundation on such principles and organizing its powers in such form, as to them shall seem most likely to effect their Safety and Happiness. Prudence, indeed, will dictate that Governments long established should not be changed for light and transient causes; and accordingly all experience hath shewn, that mankind are more disposed to suffer, while evils are sufferable, than to right themselves by abolishing the forms to which they are accustomed. But when a long train of abuses and usurpations, pursuing invariably the same Object evinces a design to reduce them under absolute Despotism, it is their right, it is their duty, to throw off such Government, and to provide new Guards for their future security. --Such has been the patient sufferance of these Colonies; and such is now the necessity which constrains them to alter their former Systems of Government. The history of the present King of Great Britain is a history of repeated injuries and usurpations, all having in direct
