Next Step Project Management

AbleNet's highly skilled project management team takes on the orchestration of the program so the individuals you provide speech services to can reach their learning potential using their newly secured QuickTalker Freestyle.

How does it work?

1. Provide SLPs a framework to address the communication device needs of the individuals they provide speech services to

2. Encourage SLPs' participation in project management to provide all individuals an equal opportunity to receive a speech device

3. Prioritize benefit checks for all individuals

4. Provide resources and support for SLPs to reduce anxiety and track progress
