

How does it work?

-  Identify client(s) who could benefit from a QuickTalker Freestyle.
-  Complete the benefit check online to determine if your client's medical insurance will cover a QuickTalker Freestyle speech device.
-  AbleNet will contact the parent for the insurance information and notify and SLP of eligibility status within 24 hours.
-  Once benefits are confirmed, your only action item as the speech-language pathologist is to write the speech evaluation, and we provide an easy-to-use template!
-  Your client receives their QuickTalker Freestyle and can utilize the ableCARE team and services!

An AAC device that works for ALL clients

The QuickTalker Freestyle is a robust and flexible speech device that allows your clients with speech impairments to communicate with others.

The QuickTalkerFreestyle offers a flexible approach to speech device funding with the ability to swap speech device size or speech app, for FREE, at any time during the 5-year warranty period. Mirror no tech, low tech, or mid tech AAC devices with a simple communication app, and as your client advances, you can swap out the speech app later on.

This flexible approach allows your clients to have their own speech device that can grow with them, rather than inhibit their communication journey.
